Here are a few reasons why H. S. Stout has succeeded in building Prof. Jas. A. Brown, of Los Angelos, the largest tailoring business in Paris: up the largest tailoring business in Paris:

FIRST-He recognized the fact that five years ago that the only

day of big profits and small sales was past.

SECOND-He cuts the price of tailor-made garments at least 40 PER CENT.

THIRD-He kept up the quality of his materials, his styles and his workmanship.

FOURTH-He always does as he advertised.

A RESULT.

As a result of this system he has built up a large trade that appreciates the fact that they save twenty dollars on a single Suit or Overcoat. "Many customers at a small profit rather than a few customers at a big profit," says H. S. Stout.

A ROUND-ROBIN

Troops Must Be Sent Home Or an Appalling Disaster is Liable.

To Keep the Army at Santiago Will Invoive the Destruction of Thousands by Yellow Fever and Other Diseases-To Be Returned.

SANTIAGO DE CUBA, Aug. 3 .- (De layed in Transmission). - Summoned by Maj. Gen. Shafter, a meeting was held this morning at headquarters, and in the presence of every commanding and medical officer of the 5th army corps Gen. Shafter read a cable message from Secretary Alger, ordering him at the recommendation of Surgeon General Sternberg, to move the army into the interior, to San Luis, where it is healthier. As a result of the conference Gen. Shafter will insist upon the immediate withdrawal of the army north within two weeks. As an explanation of the situation the following letter from Col. Theo. Roosevelt, commanding the 1st volunteer cavalry, to Gen. Shafter, was handed Interesting Correspondence Between the by the latter to the correspondent here of the Associated Press for publication: Maj. Gen. Shafter:

Sir:-In a meeting of the general and medical officers, called by you at the palace this morning, we are all as you know, unanimous in view of what should be done with the army. To keep us here in the opinion of every officer commanding a division or a brigade, will simply involve the destruction of thousands. There is no possible reason for not shipping practically the entire command north at once. Yellow fever cases are very few in the cavalry division where I command one and not one case of yellow fever has oc- ing the Rough Riders, who are curred in this division except among the men sent to the hospital at Siboney, where they have I believe, contracted it. But in this division there have been 1,500 cases of malarial fever. Not a man has died from it, but the whole command is so weakened and shattered as to be ripe for dying like rotten sheep when a real yellow fever epidemic, instead of a fake epidemic like the present, strikes us, as it is bound to, if we stay here, at the height of the sickness season, August and the beginning of September. Quarantine against malaria fever is much like quarantining against the toothache All of us are certain, as soon as the authorities at Washington fully appreciate the conditions of the army, to be sent home. If we are kept here it will in all human possibility mean an appalling disaster, for the surgeons here estimate that over half the army, if kept here during the sickly season, will die. This is not only terrible from the standpoint of the individual lives lost, means ruin from the standpoint military efficiency flower of the American army, for the great bulk of the regulars are here with you. The sick list, large though it is. exceeding 4,000, affords but a faint index of the debilitation of the army. Not 10 per cent. are fit for active work. Six weeks on the North Maine cast, for instance, or elsewhere, where the yellow fever germ can not possioly propagate, would make us all as fit as fighting cocks, able as we are eager, to take a leading part in the great campaign against Havana in the fall, even if we are not allowed to try Porto Rico. We can be moved north, if moved at once, with absolute safety to the country, although, of course, it would have been infinitely better if we had been moved north or to Porto Rico two weeks ago. If there were any object in keeping us here we would face yellow fever with as much indifference as we face bullets, but there is no object in it. The four immune regiments ordered here are sufficient to garrison the city and surrounding towns, and there is absolutely pothing for us to do here and there has not but I suggest that unless you want to been since the town surrendered. It is impossible to move into the interior. Every shifting of camp doubles the sick rate in our present weakened condition, and, anyhow, the interior is rather worse than the coast, as I have found by actual reconnoissance. Our present camps are as healthy as any camps at this end of the island can be. I write only because I can not see cur men who have fought so bravely and who have endured extreme hardships and dangers so uncomplainingly, go to destruction without striving so far as lies in me to avert a doom as fearful as it is unnecessary and undeserved. Yours respectfully,

THEODORE ROOSEVELT. Colonel Commanding 1st Brigade.

After Col. Roosevelt had taken the initiative, all the American general officers united in a round-robin addressed to Gen. Shafter. It reads:

the various brigades, divisions, etc., of the army of occupation in Cuba, are of the unanimous opinion that this army should be at once taken out of Cuba and sent to some point on the northern seacoast of the United States; adic cases: but that the army is disabled by malarial fever to the extent that its efficiency is destroyed and that it is in a condition to be practically destroyed by an epidemic of yellow fever which is sure to come in the near We know from the reports of competent officers and from personal observations that the army is unable to move into the interior and that there are no facilities for such a move if attempted, and that it could not be attempted until too late. Moreover, the best medical authorities on the island say that with our present equipment we could not live in the interior during the rainy se on without losses from malarial fever, is almost as deadly as yellow fever.

As the army can be safely moved now, the persons responsible for preventing such a move will be responsible for the unnecessary loss of many thousands of lives. Our opinions are the result of careful personal observation and they are also based on the unanimous opinion of our medical officers with the army, who understand the situation absolutely.

WASHINGTON, Aug. 5.—After a conference with Secretaries Day and Long Thursday the president had a conference with Secretary Alger, Secretary Long and Assistant Secretary of the Navy Allen, at which action was taken for the prompt transportato Montauk Point, L. It was finally concluded that there were sufficient vessels off the stated that the number of vessels now there was adequate for the removal of the army. The dispatch of the troops home accordingly will begin at once.

ROOSEVELT IS CALLED DOWN

Colonel of the Rough Riders and the Secretary of War.

WASHINGTON, Aug. 5.—The following correspondence has passed between Col. Roosevelt and Secretary Alger: SANTIAGO, July 23, 1898.

My Dear Mr. Secretary: I am writing with the knowledge

and approval of Gen. Wheeler. We earnestly hope that you will send us-most of the regulars, and at any rate the cavalry division, includ-

good as any regulars, and three times as good as any state troops, to Porto Rico. There are 1,800 effective men in this division; if those who were left behind were joined to them, we could land at Porto Rico, in this cavalry division, close to 4,000 men, who would be worth easily any 10,000 national guards armed with black powder Springfields or other archaic weapons.

Very respectfully, · THEODORE ROOSEVELT. The following reply was cabled to

Col. Roosevelt Thursday: Your letter of the 23d is received. The regular army, the volunteer army and the rough riders have done well, spoil the effects and glory of your victory, you make no invidious comparisons. The rough riders are no better than other volunteers. They had an advantage in their arms, for which they ought to be very grateful.

R. A. ALGER, Secretary of War.

Cleaning Santiago's Streets.

SANTIAGO, Aug. 5.—Gen. Wood, military governor, has appointed Maj. George M. Barbour as health and state commissioner. The city will be divided into 16 districts, under the supervision of non-commissioned officers responsible for the street cleaning in their respective localities. Four "We, the undersigned officers commanding thousand men will be immediately put to work cleaning the thoroughfares.

In this he is carrying out the wishes of the president, and it is expected that a similar policy will be adopted by all of the other executive departments affected.

The City Filling Up With Enterprising Americans Ready for Business-A Daily Paper Prints McKinley's Proclamation to Cubans.

SANTIAGO DE CUBA, July 27.-The dirty condition of this city, the heaps tion of Gen. Shafter's army from Cuba of foul refuse that encumber the streets, the maladorous alleys any byence occupied a couple of hours and ways, the lack of sanitary arrangements and drainage of any ddscription are all matters that will require action and of the means at hand to ef- remedying if this is to become an American city. It should be remembered that the weeks of blockade, coast there now for the purpose. When the fear of bombardment, the the meeting ended it was officially scarcity of food and the general demoralization existing in a besieged town have done much to add to the conditions of filth and poor sanitation that normally prevail. For generations the people have lived regardless of the first rules of hygiene, the lower classes are ignorant of all precautionary measures, and it is not surprising when our American officers issue an order through the civil governor of Santiago stating that all houses must be at once thoroughly cleaned, inside and out, the order is disregarded.

Orders are constantly issued to the people to report at once the death of any one in their household, and threats of fine and enforced labor as a punishment carry little weight. Extreme measures will have to be taken to bring about a proper condition of affairs in this respect, and it will take many months of example and stringent enforcement of regulations to bring the people to an observance of what is clearly best for their health.

Since July 16 until July 23 the city was without a daily paper. On July 23 the Espectador made its first appearance and printed the full Spanish text of President McKinley's proclamation to the people of Cuba. The Espectador is running a series of articles on New York city, this subject being supposedly of prime interest to its readers at this time. A three-column article on the inscriptions of the Egyptian obelisk in Central park appears in the last issue, and the publisher promises the declaration of the independence of the United States in the near future.

The Espectador enjoys the distinction of being the only Spanish paper published in this island free of Spanish censorship.

English is promised soon, and Company F, of the 33d Michigan volunteer infantry, has brought out a paper called Company F Enterprise, which is the first American paper published in the city of Santiago de Cuba.

Already the enterprising American is present. There is around town a ragged man with a smattering of Spanish who has turned several dollars by buying up swords and machetes and manner of evacuating Cuba and from Spaniards and the city pawn- Porto Rico and the protection of Spanshops to sell them again to American relic hunters. The first steamer from the United States has brought approval by the cortes, which will be many men to look over this new field for business opportunities, and there will be American sharpenterprise and pitted

The lack of anything like proper hotels and restaurants will continue to be a detriment to the city until some one with a knowledge of what Americans want steps in and opens a

There is much talk of the exorbitant prices charged by storekeepers for clothing, food and drink. Prices are three and four times as high as they hould be. Shopkeepers are charging at the rate of two American dollars for what sold formerly for one silver Spanish dollar. It has been found necessary to ordain that bread shall not be sold for more than 20 cents silver a pound and the announcement that there will be established soon an American bakery, to sell bread at prices prevailing in New York, is received with delight.

THREE HAPPY WOMEN.

A Trio of Fervent Letters to the Sympathetic Friend of Her Sex.

HONOR TO WHOM HONOR IS DUE.

Each Letter Tells in a Different Way of Agonies Relieved by Lydia E. Pinkham's Vegetable Compound.

Before using Lydia E. Pinkham's Vegetable Compound, my health was gradually being undermined. I suffered untold agony from painful menstruation, backache, pain on top of my head and ovarian trouble. I concluded to try Mrs. Pinkham's Compound, and found that it was all any woman needs who suffers with painful monthly periods. It entirely cured me.

MRS. GEORGIE WASS. 923 Bank St., Cincinnati, O.

For years I had suffered with painful menstruation every month. At the beginning of menstruation it was impossible for me to stand up for more than five minutes, I felt so miserable. One day a little book of Mrs. Pinkham's was thrown into my house and down and read it. I then got some of Pinkham's Vegetable Compound Pills. I can heartily say that to-day new woman; my monthly suffering the past. I shall always praise Compound for what it has done MRS. MARGARET ANDERSON, 363 Lisbon St., Lewiston, Me.

Lydia E. Pinkham's Vegetable Compound has cured me of painful menstruation and backache. The pain in my back was dreadful, and the agony I suffered during menstruation nearly drove me wild. Now this is all over, thanks to Mrs. Pinkham's medicine and advice.—Mrs. Carrie V. Williams, South Mills, N. C.

The great volume of testimony proves conclusively that Lydia E. Pinkham's Vegetable Compound is a safe, sure and almost infallible remedy in cases of irregularity, suppressed, excessive or painful monthly periods.

The Cabinet Council Agrees to the Peace Terms of the United States.

The Spanish Government Believes That the Note Will Be Satisfactory to the Washington Government and That Hostilities Will Be Suspended.

MADRID, Aug. 8.—The cabinet council terminated after having completely approved the reply to the United is reported, but it is believed that the States which, it is said, accepts the American conditions.

The reply was telegraphed to Senor Ceon y Castillo, the Spanish ambassador to France, Saturday night, so that M. Cambon, the French ambassador at Washington, will receive it Monday.

The government is fully convinced that the note will be satisfactory to the Washington government, and that a suspension of hostilities will be its immediate consequence.

concluded his conference with the queen regent. Her majesty approves the general lines of the reply of Spain to America's peace terms, which Senor Sagasta explained to her.

The reason for postponing the cabinet council until 6 o'clock Sunday evening was that the note was not yet fully drawn up. The government believes that the United States will accept Spain's answer, which will certainly reach the white house by Tuesday. As a consequence of the United States accepting the reply, hostilities will immediately afterwards be suspended.

MADRID, Aug. 8.—According to the most reliable sources of information the Spanish note is couched in dignified language. It asserts that Spain bows to the force of circumstances, having done nothing to provoke the war, into which she has been unwillingly led in the defense of her rights and territory.

It expresses a willingness to appoint delegates to meet the American commission to discuss a regime for the

Philippines. WASHINGTON, Aug. 8.—Although as yet without official confirmation of the report from Paris that the Spanish government has decided to accept the terms laid down by the United States as essential to the negotiation of a treaty of peace the officials here are proceeding under the conviction that Athe end has come and are giving attention to the steps to be taken next. In view of the delay in coming to this conclusion the idea was beginning to prevail that the Spanish government was about to enter a plea in abatement and that the answer would again be inconclusive. In this case the president was disposed to deal firmly with the issue; to give notice that our proposals were withdrawn, and to let it be understood that when Spain again sued for peace the conditions would be more severe

than those first laid down. If the Spanish answer should embody an effort to secure any material change in the conditions it will meet with prompt rejection. Some reference has been made in the dispatches of British newspapers to a desire on the part of the Spanish government to include in the preliminary agreement a clause exempting it from liability for the Cuban debt. The formal statement of the points of the United States notes given out from the white house made no reference to this subject and it can not be known as yet whether or not the full text shows anything more. But presuming that no reference whatever is made to the Cuban debt, it is possible the subject may be regarded as one that should be treated by the peace commissioners, who are to meet later to for the treaty, which, of course, will embody many details that are left untouched in the main proposition, though cabinet officers have authorized the statement that no part of the Cuban or Porto Rican debts would be assumed by the United States. Based upon the Associated Press reports of the progress being made at Madrid toward returning the answer of Spain it was calculated by the department officials that the formal note could not be delivered to the president before Monday, and that was also the belief of the French ambassador.

It is Feared That it Has Been Cabled to Madrid and May Delay the Peace Negotiations.

WASHINGTON, Aug. 6.—Aside from the inborn desire of the Spaniard to postpone doing things the reports of the condition of the American army at Santiago by Roosevelt and others may encourage Sagasta to hold out against President McKinley's terms of peace. Efforts were made Thursday to prevent the information from reaching Madrid. Cable censors barred from the wires all reference to Roosevelt's review of the situation and the round robin of the American officers.

But there was nothing to prevent members of the diplomatic corps sending the fact to their governments in cipher. Once in the possession of the European powers, the information would quickly be transmitted to Madrid, and that has undoubtedly been

War Department Worried Over the Effect the Round-Robin Will Have on the Santiago Troops.

WASHINGTON, Aug. 6.—The war department is much worried over the situation at Santiago, not from fear of any additional danger from the fever, but from the effect upon the soldiers of the action of the officers in almost creating a panic. The officials state that they have been working for weeks to prevent just what seems to have happened, a stampede among the soldiers, and if the men get disorganized it may cause trouble.

Soldiers could not be rushed pell mell on board the transports, because, if they did the conditions of the Seneca, Concho and other transports which came back with the wounded would be repeated, and again it was not possible to remove all the soldiers at once while the Spanish prisoners were still in Cuba.

Over two weeks ago a lease was made for the camp at Montauk Point, and two weeks ago work was begun on hospitals at that place. The war department notified Gen. Shafter fully two weeks ago to get ready to move his troops and only gave orders to send them to the mountains pending their removal altogether. Orders were under way to experiment by sending parts of cavalry home on the Louisiana, as it was thought advisable not transport the entire army until was found

the Louisiana made a successful trip. There was no intention to keep the army at Santiago de Cuba during August, and transports were ordered to leave that place just as soon as possible after the Louisiana had made her trip. The action of the officers in sending the round robin, the officials of the war department here claim, has stampeded the soldiers and destroyed to some extent discipline and order, which is necessary in the army. However, the officials at the war department are now straining every effort to hasten the return of Gen. Shafter's troops, and they will be removed as soon as they possibly can be. It will be impossible to remove all of them as long as the Spaniards remain there, but as soon as the regiments of immunes arrive they will take the places of the regiments on duty and these will be sent home as soon as transportation can bring

[Louisville Dispatch.] CHATTANOOGA, Tenn., Ang. 7 .-(Special.)-The boys of the Second Kentucky wil! in all probability break camp during the present week and go on a practice march to some point vet to be decided upon by Col. Gaither. The present plan is for the boys to go on a seven days' march, but Col. Gaither is using all of his efforts to obtain permis sion to go on a thirty days' march. If he succeeds in having his desire gratified he will march the boys back to old Kentucky. If he fails to secure the thirty days' march the regiment will probably go to Dayton, Tenn., which place the colonel now has in view.

The boys are greatly pleased over the idea of the march, as it will relieve the monotony of the present camp life. They hope the regiment will obtain permission from the war department to go back to Kentucky, as they would then have a chance of seeing home and they are confident that they would have a royal good time during the visit. It will probably be definitely decided within the next day or two where the regiment will go.

The Second battalion will go on the rifle range Tuesday, where they will endeavor to perfect themselves in placing a bullet in the proper place to count in battle. The First battalion had a most successful shoot on the range, and the boys are confident that they will be able to hold the record for the entire regiment. The Second is also just as conf.dent, and they are of the opinion that they will be capable of showing the First a few points in reference to target practice.

Capt. William M. Ekin, the brigade quartermaster, visited Col. Gaither to day and held a consultation with him in reference to the equipping and moving meeting which began Thursday of the regiment.

Gen Breckinridge and his aide, Lieut Desha Breckinridge, visited the regiment to-day and the general was greatly pleased with the appearance of the boys. Rev. W. W. Spates and other ministers He visited the regimental bath house and complimented Col. Gaither highly on its usefulness.

Suffered 20 Years.

nent farmer, and well known by all old residents near Belmont, N. Y .. writes: "For twenty-seven years I had been a constant sufferer from nervous prostration, and paid large sums of money for doctors and advertised remedies without benefit. Three years ago my condition was alarming; the least noise would startle and unnerve me. I was unable to sleep, had a number of sinking spells and slowly grew worse. I began using Dr. Miles' Restorative Nervine and Nerve and Liver Pills. At first the medicine seemed to have no effect, but after taking a few bottles I began to notice a change; I rested better at night, my appetite began to improve and I rapidly grew better, until now I am as nearly restored to health as one of my age may expect. DR. CALDWELL'S YRUP PEPSI CURES INDIGESTION. Official List of Garth Foud Beneficiaries.

THE report of the Garth Fund Commissioners was accepted and approved yesterday by the Fiscal Court, and it was ordered that in accordance with said report the persons named below be paid the sums opposite their names, for the fall session, 1898, or one half of the ensuing school year.

Jesse Alexander \$ 37.5	50

Beck Shiopshire 37.	50
Dean Squires 25.0	
Graham Smedley 90.0	
Michael Comack 50	
\$787 !	50

Three of the old beneficiaries have finished school and are therefore not included in the above list. No new names were added, and the allowances made were for the Fall session only, because the major portion of the Garth Fund is invested in Northern Bank shares. As the said bank has gone into liquidation the income from the fund for the near future is uncertain until the money can be reinvested in dividendpaying shares.

Dr. Geo. S. Varden, Col. E. F. Clay and Hon. E. M. Dickson, the Garth Fund Commissioners, were re-elected by the Court.

Ben Keys, Ir., was out riding on his bicycle the other day when he rode over a black snake about six feet long. The snake became entangled in the front wheel of the bike, and for a time one could not have told whether Ben or the snake was in possession of the wheel, With every revolution his snakeship would stride Ben in the back, then come over and slap him in the face and on the hands. Ben took his No. 11's off the pedals and spread them far apart, but being on a slant the wheel kept going and the snake kept striking until it got its head ground off in the chain of the bicycle. Ben has sold his wheel.

FEMININE FASHIONS.

The Materials Most in Favor with the . Ladies for Summer Costumes.

Foulard silks and satins are in marked favor this summer.

Large orders have been placed with manufacturers for lustrous white corded silks and heavy but soft-finished cream and ivory-white satins for evening toilets next season.

Pink in every tint and tone will be in great use this autumn and winter for evening gowns for youthful wearers, for dressy opera-toques and bonnets, for trimmings, and linings for round hats, and for lining velvet and cream-cloth capes for ball and theater wear.

A noted French designer uses very pretty basket-woven silks in small checks of rose-color, cream and green, fawn color, geranium pink, and violet, ecru, petunia and wood brown, for smart little gowns made with a guimpe matching one of the colors in the check, covered with silk net, with sleeve-puffs to match. The skirts are trimmed with pinked frills or ruches from hem to hips.

Many of the pretty silk, crepe de Chine and veiling dresses are finished with three tiny frills of ribbon, lapping each other, and gathered moderately full. These frills, though not novelties, are newer than those made of the dress goods, and they are given a novel effect by the deft manner in which they are adjusted, and by the beauty of the various two-toned or double-faced ribbons used. If the frills are made a bit too wide the effect is spoiled. They must not measure, all told, more than three inches; therefore, ribbons a trifle over an inch wide are the proper selection.

The newest vicuna cloths for traveling, yatching and cycling are wide diagonals of very fine, soft wool, roughly woven in a single color such as gray, blue, or fawn, and notably in navy blue, or else in two shades of a color. More novel than these are the pretty diagonals in contrasting colors, green with brown or violet, gray with rose or silver, blue with white or almond. Raised silk cords form stripes in black or dark brown on sheer lightweight wools of delicate summer coloring.

Some of the most beautiful goods in the elegant outfits for the summer are the French and India muslins, and the daintiest sort of evening gowns as well as those for dressy afternoon wear, are made of batiste, especially in flowered cream-white with trimmings of cream lace. Some of the fashionably made gowns have the muslin or batiste skirt hung over a second one of plain organdie, the tint of the background of the dress fabric. This skirt is cut exactly like the outside one, and either plainly hemmed or finished with a lace-edged ruffle. The silk underslip is worn beneath. This arrangement is followed when a very airy effect is desired. In other cases the silk slip alone is used.-N. Y. Post.

BE HAPPY AS YOU CAN.

This life is not all sunshine, Nor yet is it all showers, But storms and calms alternate, As thorns among the flowers; And while we seek the roses, The thorns full oft we scan, Still let us, though they wound us, Be happy as we can.

This life has heavy crosses As well as joys to share, And griefs and disappointments Which you and I must bear; Yet if misfortune's lava Entombs hope's dearest plan, Let us, with what is left us, Be happy as we can.

The sum of our enjoyment Is made of little things, As oft the broadest rivers Are formed from smallest springs; By treasuring small waters, The rivers reach their span; So we increase our pleasures,

Enjoying what we can.

As happy as we can.

There may be burning deserts Through which our feet must go. But there are green oases Where pleasant palm trees grow; And if we may not follow The path our hearts would plan, Let us make all around us

Saved His Life by a Jest.

Archee Armstrong was the weil-beloved jester of King James VI. of Scotland, afterward James I. of England. and this is the traditional story of their introduction: "One day a shepherd with the carcass of a sheep over his shoulders was tracked to his cottage on the moorlands by the officers of justice. In the cottage they found a vacant-faced lad, rocking a cradle with more attention than a boy is accustomed to give that duty; this, however, did not arouse their suspicions. They searched the cottage thoroughly, but failed to discover the sheep. They were about to depart, when one of their number accidentally looked into the eradle, and—the stolen sheep lay there! The lad, who was supposed to be the thief, was brought before King James VI. of Scotland. He was tried, convicted, and sentenced to die. He began to plead with the king. He was a poor, ignorant fellow, he said; he had heard of the Bible and would like to read it through before he died. Would the king respite him until he did so? The king readily gave his consent, whereupon the culprit immediately said: "Then hang me if ever I read a word o't, as lang as my een are open." The witty reply captured the king. He pardoned the prisoner, and took him into his service as jester In this capacity Archee was soon a prime favorite.-Amelia Wofford, in St. Nicholas.

Evading the Law. A collier who amused himself with flying pigeons had occasion to go to town recently, and took with him a bird in a bag. He was about to toss up the pigeon in the town hall square when a policeman came up and told him that he must not fly the bird there. "Why not?" asked the collier. "Because it is forbidden, and I shall have to lock you up if you do." The collier, with the usual sharpness of his kind, thereupon took the pigeon out of the bag, set it on the ground, stroked its wings and said to it: walk whoam." The bird, of course, rose in the air, leaving the policeman petrified with astonishment .- London Telegraph.

LI HUNG CHANG'S BIBLE.

The Viceroy Had a New Testament in His Library and Was Much Interested in It.

Dr. Coltman, in "The East Asiatic Lloyd's," relates an interesting conversation he had lately with Li Hung Chang on the subject of the Bible He says that one day when he called on the aged statesman he found him reading a beautifully bound New Testament, which had recently been sent him by a missionary connected with the London mission. Americans Crowded from Philippines. As is well known, America was supreme in the Philippine trade from the opening of the export business of the islands on a large scale until within a few years. The reasons for the decline of American influence were largely the drawing out of capital by the older members of the great American trading firms and their leaving the business to younger members of their families, who found themselves with great responsibilities and a reduced capital. Gradually English firms with abundant capital succeeded to the bulk of the business. The last American firms in Manila were crowded out three years ago by Spanish intrigues, caused by the hatred of Americans growing out of the Cuban troubles. This overthrow was managed by the thousand and one petty annoyances of legal machinery that the Spaniards exerted against American firms.-Scribner's.

Oldest Town in L'linois.

The abandonment of the post office at Kaskaskia, Ill., for want of patronage, calls to mind the fact that this is the oldest town in the state, having been founded by La Salle in 1682-the same year in which Penn founded Philadelphia. It has remained distinctively French to this day, and the modern movement seems to have gvoided it.

HOMES IN NEBRASKA

If you think of changing your location rememberthis; Nebraska's soil is rich

and easily tilled. No rocks and stumps. All grains and fruits that succeed in other states in same latitude flourish there. The climate is well-nigh perfect, the air being dry and free from malaria. An abundance of pure water is found. It is a great state for stock raising and feeding. There is no state in the Union where a hard-working farmer can do so well. Thousands of poor men have become rich in Nebraska. Farms can now be bought on easy terms. Prices are low. A handsome illustrated pamphlet describing Nebraska will be sent free on application to P. It so respondingly low rates from other Central happened that Andrew Johnson and his opponent for the United States senate, Gus Henry, were to meet in joint debate in this precinct. The evening came, the two speakers as they ascended the rostrum. Henry opened, and as a bid for the Irish vote he told in withering terms how Johnson, when in congress before, had voted against a bill for an appropriation to assist Ireland during a yeoman work for the passage of the bill, while this other man, who was now asking their support, had done everything possible to defeat it. It was a fine point, and the speaker made the most of it, burning before it the lamp of his eloquence until the crowd were wild with excitement. Then Heary sat down, and Johnson got up amid catcalls and scoffs to answer him.

"What my opponent has told you is Heigho! something soft swept my cheek, I detrue," he said. "Ireland was suffering, and I voted against an appropriation for her relief, for the money which it was thus proposed to give away was not mine, but yours; yours because it was in the public coffers. The judge's entire demeanor underwent a rapid transformation.

"Great goodness!" he exclaimed in a horrified tore. "The prisoner is acquitted and the clerk will please make out a warrant for the arrest of the firm for assault with intent to kill."-Washington Star.

A War Relic.

George M. Millington, a veteran of the Seventeenth regiment, while visiting his brother, the Rev. Richard Millington, at Coonrod, found among the latter's war relics a poster printed on cloth calling for recruits for the Seventeenth Michigan infantry. The poster reads as follows: "Seventeenth regiment, Michigan infantry. One hundred dollars' bounty! First month's pay in advance! Rendezvous, Detroit barracks Fifty recruits wanted to fill up a company in the new regiment, to serve for three years or during the war, unless sooner discharged. Recruits will receive \$13 per month, with board, clothing and medical attendance, to commence from the day of enlistment, and a bounty of \$100. Apply to Alfred Abeel, first lieutenant Seventeenth Michigan infantry. Recruiting office opposite Rathbun House." The poster also bears the picture of an eagle, with spread wings, bearing in its mouth a streamer on which are the words, "Michigan true to the Union." The Rev. Mr. Millington gave the poster to his brother, and the latter prizes it very highly. -Rome Sentinel

His Autograph.

"You are the celebrated Mr. Chumley Jones, I believe?"

"That is my name, sir. What can I do for you?"

"Well, Mr. Jones, I came to ask you for your autograph.'

"My autograph? Delighted, I'm sure! Have you any preference as to its form?" "If it is all the same to you, Mr. Jones, I should prefer it at the bottom of a check for \$50, made to the order of Snip & Cuttum, tailors. You have the bill, I believe."-Harper's Bazar.

West Turkestan is thinly populated and has few schools. The Russian government has fitted up as schools a few railroad carriages, which remain at each station for a few weeks. The teacher lives in the carriage. The children are required to learn a lesson or two until the itinerant school again reaches their neighborhood.

A Cord of Wood.

Few persons comprehend the productive capacity of a cord of wood. Chemical experiments are occasionally developing new uses for wood in matters remote from its ordinary adaptability, and the feature that is exciting a great deal of interest just now is the transformation of wood products into liquids. Although under the strongest kind of pressure wood yields scarcely any moisture, by means of heat wood will evolve gases and liquids of marked potency and utility. In converting wood into charcoal gases and smoke arise which can be condensed into pyroligneous acid. It is estimated that there is fully 65 per cent and from it are extracted wood alcohol, acetate of lime and wood tars. The alcohol thus obtained is said to be a very satisfactory substitute for grain alcohol for mechanical and manufacturing purposes, and it can be produced at less than one-third of the cost of the grain Investigations conducted with prac-

tical objects in view have disclosed these interesting facts: A cord of wood which weighs 4,000 pounds will yield about 2,050 pounds of myroligneous acid and 700 pounds of charcoal; the acid will produce about 9 gallons of 82 per cent crude wood alcohol, about 25 gallons of tar and fully 200 pounds of acetate of lime. These facts indicate a future for wood outside of the realm of "Remember the Maine" Store to Save Money in Dry Goods, Clothing, fuel and pulp. - New York Times.

Hubby's Good Qualities.

The curate was making a call on a humble member of his flock, when the good woman, in course of conversation, very much extolled the virtues of her absent husband and finished up by saying, "And he is such a good man too."

"In what way?" asked the curate. "Why, sir," she said, "he always says his prayers every night of his life -drunk or sober-he never misses that."-London Telegraph.
